

NEW!

Bunkers & Bumps™

Boost Guest Per Capita Spend with this Fun, Natural-Style Putting Course!

Bunkers & Bumps™ is an eco-friendly, customizable putting course incorporating miniaturized synthetic turf fairways / greens with rolling terrain, “bumps”, contours, undulations, rough turf surroundings and faux sand “bunkers” to create a traditional golf experience for all ages.

Recently popularized by a professional golfer, many venues are discovering the appeal of such realistic-looking golf putting courses that are attracting and extending guest visits. In turn, this is creating the opportunity for increased guest per-capita spending, boosting other revenue centers such as food and beverage, enhancing the guest experience and improving bottom-line performance.

Unlike traditional mini golf that often uses bricks, walls for boundaries, obstacles and theme elements, Bunkers & Bumps relies on various terrain designs and rough turf to shape holes.

Bunkers & Bumps Features:

- Enhanced AGS Modular Advantage® topography with rolling terrain.
- Interlocking, patented, flexible panels that won't shift or crack provide the look and feel of a concrete built course without requiring extensive excavation.
- Faux sand bunkers.
- Lower cost, faster installation and less maintenance compared to concrete built courses.

Eco-Friendly:

- Interlocking, patented, flexible panels are made from recycled materials.
- Panels are permeable, offering instant drainage to prevent runoff or erosion.
- Higher grade of artificial putting turf includes water drainage features.
- Proprietary “bump” system allows water flow-through drainage.

An eighteen-hole Bunkers & Bumps course is condensed to fit 12,000 square feet and a nine-hole course will fit in 6,000 square feet, which is easily converted into 18 holes by adding two golf hole cups per hole. See backside for sample course layout!

Contact us today for pricing and explore how Bunkers & Bumps can be customized for your venue to increase fun for your guests and increase per capita guest spending!

Bunkers & Bumps™

Natural Putting Course Layout for 18 Holes

**18-hole sample layout below is 11,000
square feet or 1,022 square meters**

Color rendering of 18-hole AGS Bunkers & Bumps course shows optional pond-less water feature. The pond-less design provides minimal maintenance and low operating costs.

Unlike traditional mini golf that uses golf hole edging such as bricks and putt-through or around obstacles/theme elements, eco-friendly Bunkers & Bumps relies on various terrain designs and rough turf to shape holes and fairways.
