

The **Custom Modular System** from AGS Means

Miniature Golf & Game Courts Can Go Anywhere!

The Harbor Golf Club is a challenging par-57 miniature golf rooftop course in Avalon, New Jersey. AGS designed and installed the course with ridges, slopes, rock formations, putts that will break and six par-4 holes using their Custom Modular System.

The AGS Custom Modular System enables the installation of miniature golf courses and game courts virtually *anywhere* indoors or outdoors, with permanent or even temporary / moveable functionality.

It is an ideal system that can be used at sport stadiums, with traveling marketing campaigns or pop-up applications, optimizing and monetizing rooftop spaces, providing entertainment on cruise ship decks and other places where heavy, concrete construction is not practical.

The primary component of our custom modular system is our eco-friendly, permeable, patented interlocking panels that are lightweight and durable, with excellent drainage for quick-dry / no-mess performance.

Other features include:

- Optional enhancing of your course with contours and undulations as well as faux sand traps, faux rocks, special theme elements and more.
- Allowing water to flow through our product layers for easy drainage.
- Ability to withstand heavy 24/7 foot traffic in all kinds of weather.
- Easy and accessible servicing and inspections.
- A proprietary anchoring system that is safe, secure and even seaworthy!
- ADA compliance; typically 50% or 100% of a course will be wheelchair accessible.

Contact us today to discuss your available space and explore how the AGS Custom Modular System can help your venue be more appealing and profitable!

Miniature golf course created using the AGS Custom Modular System simulated the ups and downs of Scotland's terrain for a traveling Glenlivet marketing program.
